The power of magnification

THE POWER OF MAGNIFICATION

Find out how magnification can enhance your practice

We introduce you to our **advanced magnification technology**, your ally in the quest for a **sharper, clearer, and more accurate vision** for your clinical practice.

Each specialty in the dental field has specific requirements. For this reason, our loupe and microscope systems are **carefully designed** to **enhance accuracy and comfort** in your daily routine, enabling you to provide the **highest quality** treatment to your patients.

ERGO

GALILEO

KEPLER

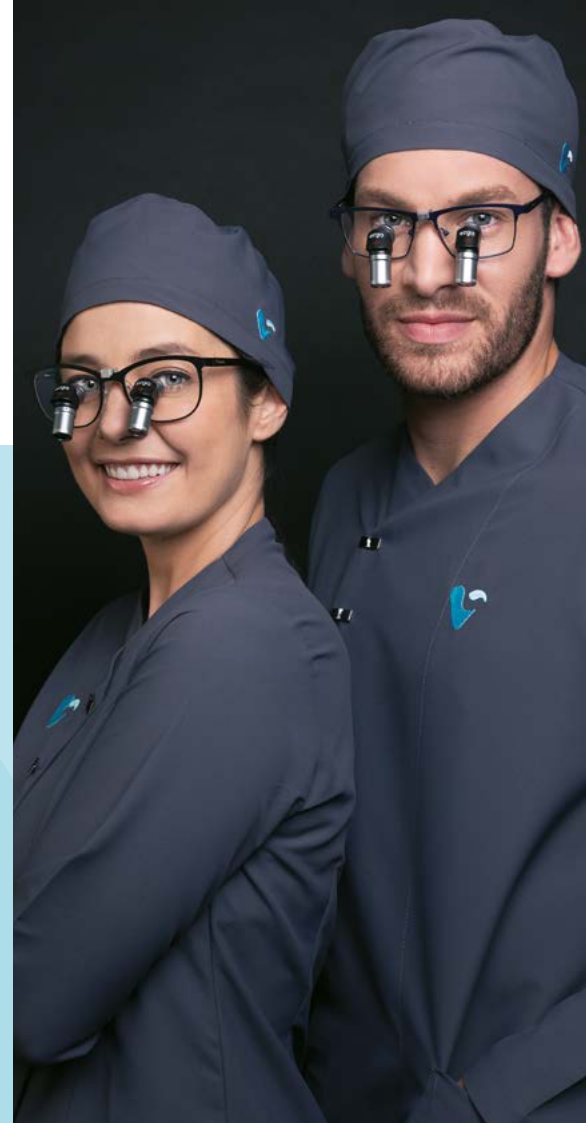

THE WIDEST MAGNIFICATION RANGE

COMPATIBLE WITH HIGH PERFORMANCE LED LIGHTS

OPTIONAL HD CAMERA AND INTEGRATED LIGHT

CUSTOMIZED LOUPES

We custom-design dental loupes with **personalized optical guidance**. We are **pioneers in the Ergo technology**. Our Ergo loupes are the first in the Spanish market to be **completely ergonomic**, as they allow the visualization of the working area without the need to tilt the neck, keeping your back completely straight.

A WIDE RANGE OF MAGNIFICATION

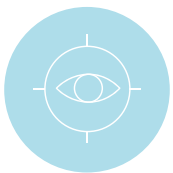

For those who are looking for a step beyond, our german-sealed dental microscopes, from **CJ-Optik's Flexion range**, offer a **greater magnification level**, accuracy and the ability to **film and record** treatments.

PERSONALIZED SERVICE

From the product selection to its delivery, our service is characterized by its **closeness and personal attention. We are here to support you in every step!**

THE POWER OF MAGNIFICATION IN YOUR HANDS

Our magnification technology allows for **accurate diagnostics**, improves your postural habits and reduces visual tension. We perform an **ergonomic study on your dental clinic** to find the perfect loupes for you.

Dr. José Conde

DENTIST

“Working with the **CJ-Optik microscope** allows me to perform treatments that I used to deem impossible. **When something as simple as the ability to see makes you different.**”

Dr. José Aranguren

DENTIST

“Vittrea's Ergo loupes facilitate an **ideal ergonomic posture**: a straight spine, relaxed eyes, an appropriate focal distance with our working method and they can be used in **any specialty.**”
